NNS initiatives

- Trying to involve all neuromodulation modalities
- Nurse Network
- Science Coordinator

NNS Science Coordinator

- Supervise the establishment of a Nordic Neuromodulation Research Collaboration (NNRC).
- Help continuously develop the infrastructure needed to promote common Nordic research projects.
- Confer regularly with the NNS board to discuss and further develop research within the field.
- Be part of the Scientific Committee for NNS meetings and participate in preparing the meeting program.
- Help identify research funding opportunities.

Possible long-term perspectives:

- Found a NNS scientific committee under the auspice of the NNS.
- Contribute to the development of a Nordic knowledge base for research policy making and research strategies
- Assist less experienced neuromodulators to be involved in research and encourage publication within INS journal.
